MINDEX'S SUPERPOWERS

CLOUD-NATIVE APPLICATION DEVELOPMENT

From conception through design, implementation and operation, we create innovative, scalable, and API-driven software applications that help reduce risk and increase automation.

DEVOPS ENABLEMENT

With DevOps tools and technologies, we help customers gain control of their cloud and increase agility through automation, configuration management, continuous deployment technologies; and monitoring and management.

CLOUD ARCHITECTURE, MODERNIZATION AND MIGRATION

We have strong expertise with a variety of cloud technologies and workloads. We design and build well-architected environments, helping customers convert legacy applications to the cloud.

Minindex has the hunger and interest to take time to understand us and our problems. I feel comfortable trusting them, and am confident they put their best into supporting our infrastructure and making us successful.

TECH STACK EXPERIENCE

- Azure DevOps
- SQL Server, Azure AD, .NET

I've dealt with other companies where the people are dry, or inflexible. With Minindex, it's always been a fun working relationship. They are genuinely good people with great personalities, are easy to work with, and have a strong set of experiences and skillsets. That makes a difference because that's the thing that makes everything go faster. I'm not cringing when talking to the Minindex team.
